"This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments".

"This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments"

Dividend Summary for the period 1st April 2025 to 31st March 2026

"This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments".

"This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments".

"This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments".

(f)Average Portfolio maturity (years):3.9056

"This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments".

Dividend Summary for the period 1st April 2025 to 31st March 2026

(f)Average Portfolio maturity (years):1.2595

"This scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments".

22 FAIR VALUE MEASUREMENT

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
ii) Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
iii) Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation Techniques and Classification:

Asset Type	Source of Pricing *	Classification
Equity and related securities -Listed	last quoted closing price on the Stock Exchange	Level 1
-Unlisted	valued in accordance with the fair valuation norms prescribed in the SEBI guidelines	Level 3
Futures	Settlement price on the stock exchange	Level 1
Corporate Bond (Non-convertible) Certificates of deposit Commercial paper Treasury Bills State Government Securities Central Government Securities Interest Rate Swap	Average of prices provided by CRISIL and ICRA	Level 2
Gold Silver	valued in accordance with the fair valuation norms prescribed in the SEBI guidelines	Level 2
Corporate Debt Market Development Fund	NAV published on Association of Mutual Fund of India (AMFI)	Level 1
Mutual Fund Units -Listed and Traded	closing traded price on Exchange	Level 1
-Unlisted	NAV published on AMFI	

* For detail Valuation Policy refer 3.3 Valuation of Investment in Notes to Accounts

Refer **Table 1** for financial instruments recognised at fair value as at 31 March 2026 and 31 March 2025:

Refer **Table 2** for the carrying amount of financial assets and financial liabilities other than those carried at FVTPL

23 FINANCIAL RISK MANAGEMENT

The Scheme's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Scheme's AMC has overall responsibility for the establishment and oversight of the Scheme's risk management framework. The Scheme's risk management policies are established to identify and analyse the risks faced by the Scheme, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Scheme's activities. The Scheme's Trustees quarterly monitors compliance with the Scheme's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Scheme which are summarised below.

The Scheme uses different methods to measure and manage the various types of risk to which it is exposed; these risks are explained below.

I Market Risks

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign currency rates, interest rates, other price risks). The Scheme is exposed to market risk primarily related to Price risk, Foreign currency risk, and Interest rate risk

a) Price Risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Scheme's exposure to price risk arises from investments in Equity, Preference Shares, Invit, Corporate Bond, Certificates of deposit, Commercial paper, State Government Securities, Central Government Securities, Mutual Fund Units, Corporate Debt Market Development Fund, Futures, Interest Rate Swap, Gold and Silver which are classified as financial assets at Fair Value Through Profit and Loss.

Refer **Table 3** for the Scheme's exposure to price risk:

The Scheme reviews the credit concentration of equity, debt and money market securities held based on counterparties and industries. Refer **Table 4 for** the Scheme's portfolio (excluding derivatives) exposures were concentrated as on reporting date, :

There were no significant concentrations in the equity, debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 or March 31, 2025.

The Manager mitigates the risk through the use of investment strategies that seek to minimise the Scheme's tracking error as compared to market indices with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value.

Refer **Table 5** for summary of the sensitivity of the Scheme's net assets attributable to holders of redeemable units to price movements:

(b) Foreign currency risk-There is no exposure in Foreign Currency.

(c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Scheme's financial assets are Corporate Bond, Certificates of deposit, Commercial paper, State Government Securities and Central Government Securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, Refer **Table 6** for the impact on Scheme's net assets due to decreased or increased. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Table 7 analyses the Scheme's interest rate risk exposure. The Scheme's interest baring assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

II **Credit risk**

Credit risk is the risk that the Scheme will incur a loss because its counterparties fail to discharge their contractual obligations. The Scheme is exposed to the risk of credit-related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Scheme's counterparties by reviewing their credit ratings, financial statements and press releases on a regular basis.

i. Credit quality analysis

The Scheme's exposure to credit risk arises in respect of the following financial instruments:
- Cash and cash equivalents:
- Contract for sale of investment in securities and Derivative financial instruments receivable:
- Securities Lending and Borrowing (SLB):
- Investments in debt and money market securities; and
- Derivative assets:

Cash and cash equivalents

The cash and cash equivalents are held with bank and Tri Party Repo, which are generally highly rated, based on ratings provided by rating agencies.

Contract for sale of investment in securities and Derivative financial instruments receivable

Contract for sale of investment in securities and Derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. All Contract for sale of investment as on reporting period are settled subsequently.

Securities Lending and Borrowing

Credit risk relating to receivables from Securities Lending and Borrowing is considered low due to the quality of collateral and due to involvement of exchange.

Investments in debt and money market securities

As at March 31, 2026, the Scheme was invested in corporate debt and money market securities. Refer table 8 for the rating wise exposures of the scheme's debt & money market instruments as at March 31, 2026. The ratings are provided by credit rating agencies.

Derivatives

The **table 9** shows an analysis of derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025:-

ii. Concentration of credit risk

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

Refer **Table 4**, for the Scheme's portfolio (excluding derivatives) exposures concentration as at the reporting date,

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 or March 31, 2025. (Net Current Assets are not considered while disclosing the credit concentration)

iii. Expected Credit Loss principles

For purposes of impairment assessment, the Schemes' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Scheme is exposed arises from the Scheme's investments in Corporate Bond, Certificates of deposit, Commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

III Liquidity risks

Liquidity risk is the risk that the Scheme will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Scheme's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Scheme's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Scheme's short-term, medium-term and long-term funding and liquidity management requirements. The Scheme manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

Table 10 shows the maturity analysis of financial liabilities of the Scheme based on contractually agreed undiscounted cash flows:

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/(outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

24 OFFSETTING FINANCIAL ASSETS AND FINANCIAL LIABILITIES

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.□

25 MATURITY ANALYSIS OF ASSETS AND LIABILITIES

Refer **Table 11** for an analysis of assets and liabilities according to their maturity profile:

S.R. BATLIBOI & CO. LLP MUMBAI CHARTERED ACCOUNTANTS

UTI MUTUAL FUND MUMBAI

26 CAPITAL MANAGEMENT

Unitholders are entitled to receive proceeds of the NAV per unit of that Scheme for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Scheme's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited / debited to the equalisation account

The Scheme may take appropriate steps in order to maintain, or if necessary adjust, its capital structure

27 EVENTS AFTER REPORTING PERIOD

There are no events after the reporting period to be disclosed

28 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on 24 April 2026.
